NASA SPACE APPS CHALLENGE 2026 · MENDOZA SITE

Circli is the Technology Partner of the Mendoza site of the 2026 NASA Space Apps Challenge

The site has about a hundred confirmed registrations and a Circli web portal to organize teams, choose challenges and record the links to the projects.

NASA SPACE APPS MENDOZA

DATE	VENUE	CIRCLI'S ROLE
November 14–15, 2026	Universidad de Mendoza	Technology Partner of the Mendoza site

FOR IMMEDIATE RELEASE · MENDOZA, NOVEMBER 14, 2026

MENDOZA, Argentina, November 14, 2026 — Circli, the Argentine events and communities platform, is the Technology Partner of the Mendoza site of the 2026 NASA Space Apps Challenge. The main days take place this Saturday, November 14, and Sunday, November 15, at the School of Architecture, Urbanism and Design of the Universidad de Mendoza, and as of November 14 the site has about a hundred confirmed registrations. The site is organized by the Club Aeroespacial de Mendoza and The Mars Society Argentina. The Circli portal lets teams organize, choose challenges and record the links to the projects submitted on the official platform.

Teams and challenges in one place

Registered participants can open the event portal from their phone's browser —with a link or a QR code, with nothing to download— and find the agenda, the site's rules and the organizers' announcements there. On the team board, those who arrive without a team can look for one or start their own, and each team chooses which of this edition's 14 challenges it will work on.

The official project submission happens on spaceappschallenge.org. In the portal, each team leaves the link to its already submitted project and picks the recognition categories it is applying for, with a short justification. That way, the local jury finds everything organized in one place.

Until Sunday night

The submission deadline for the site is Sunday, November 15, at 11:59 p.m. Argentina time. Until then, the teams work on their projects with the support of the site's mentors, and the organizers reach them through the portal.

"In a hackathon, the first hours go into finding who to work with and on what. We want that time to go back to building," Circli said.

A hackathon that started on Friday

On Friday, November 13, the site held its pre-event at the Espacio Cultural Julio Le Parc: talks by the mentors and, to close, networking and team building.

"We are glad to support the Mendoza teams and to provide a tool so they can get organized and work together," the company added.

Circli takes part as Technology Partner of the Mendoza site. This collaboration is limited to the local organizers: it is not an agreement with NASA or CONAE, nor does it imply their endorsement or that of the program's other partner agencies.

ABOUT CIRCLI

Circli is an Argentine events and communities platform, based in Mendoza, that uses artificial intelligence to help the right people meet. Attendees get in from their phone browser, with nothing to download, and can receive suggestions of who to talk to, with the reason why, depending on the event's plan. It offers a free self-service plan, with basic support, and a team-supported option before, during and after the event. Circli was the technology partner of Sitevinitech 2026, Mendoza Coopera and Oficios Tech Day 2026, supports CuyoConnect's hackathons and is a member of Polo TIC Mendoza. More at circli.app/prensa.
